DESIGN CONSULTANT

WORK EXPERIENCES

Since Nov 2017 AP Design Consulting, Mainz: Founder - Industrial Designer Consultant

Nov to Dec 2017 R + V Versicherung / MO14, Wiesbaden: Design Consultant

As self-employed, I led the concept design process and support a three persons team, on an autonomous vehicle project:

Analysis phase: project description, brainstorming animation, analysis of the existing, design and functional specifications with the MO14 team

Concept phase: Creative brainstorming with the MO14 team, researches sketches, using scenario

Development: digital 2D sketches, integration picture

Sept 2017 to Nov 2017 Hyundai with Twin GmbH, Rüsselsheim: Digital Sculptor

Exterior digital modeling on the i20 design proposal

Interior digital modeling on a MPV for the chinese market

Based on sketches and mesh scan, I developed exterior and interior parts with designer and design leaders

July 2012 to May 2017 EDAG, Rüsselsheim: Industrial designer & Alias modeler

Interior and exterior A class modeling on production cars for Opel, Honda, VW

Interior and exterior 2D sketches on production cars for Chinese market and on concept cars: EDAG Genesis, Light Sport Car

Based on the technical specifications, I developed cooperative projects with different related services: marketing, engineering and design departments

Since November 2016 HEOL: Design leader

The HEOL association developed a solar prototype for worldwide car races. And now, they wanted to develop a car for private needs which is matching with my skills and my interest for innovative mobility. I manage a team of two persons for the Hx1 project (autonomous car designed for the city)

Sept 2011 to June 2012 DIEDRE DESIGN, Versailles: Industrial designer

3D Design of a "cockpit lab" for an aircraft developed for Airbus

Graphic design "Pack Eco Vidange": oil changing kit for cars

AWARD: Packaging Award TOTAL Eco Oil Change Pack

Oct 2011 to Dec 2011 E OXO: Transportation designer (freelance)

I was asked to design exterior 2D sketches based on a technical package for a riding mower. Moreover I also did the 3D surfacing design in collaboration with their engineer team

June 2011 to Aug 2011 FAURECIA INTERIORS, Méru: Digital sculptor (freelance)

In collaboration with designers and engineers, I designed with Alias a preliminary project dashboard for the Renault Scenic based on the Renault Espace.

Jan 2011 to April 2011 FRAIKIN, Paris: Commercial assistant

Customers related for any technical assistance, following contracts and answering tenders

Oct 2010 to Dec 2010 Remi COOLS: Transportation designer (freelance)

Following the customer's specifications, I made modifications based on a 3 wheels chassis to adapt the exterior body.

INTERNSHIPS

May to Aug 2010 INDUCT,Gennevilliers: Assistant project manager

INDUCT (now Navya) is a startup that is developing autonomous shuttles. They developed "Modulgo" an electric and autonomous car for car sharing. I assisted the project manager to find suppliers, and developed a sustainable global process for the complete life cycle of electric vehicle. These researches was the theme of my research master at the Université Technologique de Compiègne.

March to May 2010 MIA ELECTRIC,Cerizay: Assistant project manager

MIA ELECTRIC a small car maker that is developing the Mia, a small electric vehicle for the city. I was responsible to manage the pre series production: between the design center, the production line managers and the purchasing department, I managed the different produced versions of the Mia

June 2009 to Sept 2009 PM DESIGN, Roissy: Industrial designer

July 2008 to Oct 2008 PROTOSCAR, Rovio: Transportation designer

Protoscar is consultant for cars makers specialized in clean cars. I was in charge to make design proposals, 2D and 3D models, for the conceptualization phase on the Lampo Project, an electric roadster presented at the Geneva Motor Show 2009

June 2007 to Aug 2007 EDAG, Voisin Le Bretonneux: Industrial designer

DIPLOMAS

2009 – 2010 Master Degree – Université Technologique de Compiègne

Master Innovation, Connaissance et Interaction

2005 – 2009 Master Degree – ISD Rubika, Valenciennes

Transportation design and Digital design course

SKILLS & COMPETENCIES

- **Design:** -Hand sketching, Photoshop, Alias Sketchbook Pro, Photoshop, Adobe Première

- Innovation: Concept development, creativity

- Modeling: Alias Surface, A class, Rhino 3d,

- **Languages:** French (native), English (fluent) and German (good knowledge)

AWARDS

- 2011: Carrefour des Possibles – Renault: Autolib 2.0 : Personalized vehicle for car sharing

HOBBYS

- Sports: Running (half marathon), swimming

- Founder and co manager of a Facebook group for French speakers in Mainz and Wiesbaden ; more than 450 members and more than 40 events organized
